

**CLEAN VERSION OF REPLACEMENT PARAGRAPH/SECTION/CLAIM****IN THE SPECIFICATION**

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is submitted to avoid the objection raised by the Examiner. No new matter has been introduced into the substitute specification.

**IN THE CLAIM:**

Please cancel claim 6 without prejudice and substitute therefor the following new claim 7 (in "clean form"):

---

--7. A method of forming a trade mark decoration on a soft ribbon stripe comprising the steps of:

- ①
- a) thermal pressing a combination end of the ribbon stripe to cure a texture of the ribbon stripe;
  - b) fastening the combination end of the ribbon stripe onto a mold;
  - c) mixing injection molding material with a material having properties of the material of the ribbon stripe so that this mixture of materials and the ribbon stripe form as one unit when melted;
  - d) injection molding of the mixture into the mold holding the combination end of the ribbon stripe in order to form a primary blank plastic material that includes a protruded trademark pattern;
  - e) placing the primary blank plastic material into a second mold where
